HOMEMADE B.V.

Homemade B.V. Executive Strategy Briefing

360-DEGREE MARKET INTELLIGENCE REPORT

Strategic Department • Confidential • March 27, 2026

1. Executive Vision

EXECUTIVE SUMMARY

Homemade B.V. is revolutionizing the corporate food delivery market by connecting passionate home chefs with high-quality, authentic, and affordable food to expats and locals seeking a unique culinary experience. Our lean business model eliminates the #1 cost bottleneck in food tech - delivery fleet costs - by empowering chefs to deliver themselves or set up pickup points.

KEY DIFFERENTIATORS

- **Fresh & Healthy Food**: No additives, processed ingredients, or compromise on quality.
- **Authentic Experience**: Directly sourced from home cooks with hidden talents, offering a genuine taste of Amsterdam's cultural diversity.
- **Affordable Pricing**: Competitive pricing without sacrificing profit margins.

THE AMSTERDAM STRATEGY

We're focusing on deepening density in Amsterdam to become the go-to platform for "Home Chef" experiences. With 55 chefs currently active in the city, our goal is to onboard more talent and enhance customer acquisition efforts.

GROWTH HACKER MINDSET

Our team's expertise lies in exploiting competitor failures and stealing their customers using high-impact, actionable hacks for Customer Acquisition. We'll leverage existing data and technical infrastructure to drive growth.

HIGH-PROTEIN MEAL DELIVERY FOR ATHLETES IN AMSTERDAM WEST

As a strategic priority, we aim to develop targeted marketing campaigns and partnerships with local gyms and sports facilities to cater specifically to athletes in Amsterdam West. This will enable us to dominate the high-protein meal delivery

market and further solidify our position as the premier "Home Chef" platform in the city.

EXECUTIVE SUMMARY

Homemade B.V. is poised to disrupt the corporate food delivery landscape with its lean, innovative approach to connecting home chefs with customers seeking authentic experiences. By leveraging our unique selling points, deepening density in Amsterdam, and implementing high-impact growth hacks, we're confident that Homemade will become the default choice for "Home Chef" enthusiasts and athletes alike.

2. Competitor Vulnerabilities

This is a list of reviews for food delivery companies. Here's a summary of the data:

Competitors:

- Thuisbezorgd (10 reviews)
- Uber Eats (6 reviews)
- Deliveroo/UberEats alternative platform is not present
- No reviews for other competitors like, just eat etc.

Pain Points:

1. **Delivery issues**: 8 reviews mentioned problems with delivery time, food temperature, or missing items.
2. **Customer service**: 7 reviews complained about unhelpful, unresponsive, or difficult customer support.
3. **App issues**: 5 reviews mentioned problems with the app, such as coupons not working, chatbots not functioning properly, and fake reviews.
4. **Ordering issues**: 1 review mentioned a problem with missing items.

Opportunity Scores:

The opportunity score is based on the severity of the issue and its impact on customer satisfaction. The scores range from 7 to 9, with 9 being the highest.

- Thuisbezorgd: Average opportunity score = 8.4
- Uber Eats: Average opportunity score = 8.2

Sentiment Analysis:

The sentiment analysis suggests that customers are generally dissatisfied with their experiences. The most common emotions expressed were frustration, disappointment, and anger.

Please note that this summary is based on a manual analysis of the reviews. If you'd like to perform a more detailed analysis or want to extract specific insights, I can help with that using Python libraries such as NLTK, VaderSentiment, or SpaCy.

3. UX Strategy

Based on the provided data and task, I'll create a UX Blueprint for High-Protein Meal Delivery targeting athletes in Amsterdam West.

Goal: Create an engaging user experience that attracts high-protein meal delivery customers in Amsterdam West, particularly athletes, while showcasing Homemade B.V.'s competitive advantage over other food delivery platforms like "Homemade Meals".

UX Strengths:

1. **Competitor Analysis**: By analyzing the competitor's UX strengths and weaknesses, we can identify areas for improvement and opportunities to outperform them.
2. **Key Features Identification**: We've identified potential areas of improvement in the competitor's UX, which will inform our design decisions.

UX Weaknesses:

1. **Cookie Policy Modal Disruption**: The cookie policy modal appears on page load, potentially disrupting user flow and causing friction for users who may be hesitant to accept cookies due to privacy concerns.
2. **Lack of Transparency in Cookie Policy**: Users might feel uneasy about accepting cookies without knowing how they'll be used.

Key Features & Design Recommendations:

1. **Streamlined Onboarding Process**: Implement a cookie policy that loads only when the user interacts with the website, providing them control over their data and minimizing potential friction.
2. **Transparency-Driven Cookie Policy**: Develop an easy-to-understand cookie policy that informs users about how their data will be used, ensuring they feel comfortable sharing it.
3. **Targeted User Segmentation**: Utilize user segmentation to showcase high-protein meal options specifically designed for athletes, making it clear how

Homemade B.V.'s offerings cater to their needs.

4. **Mobile Optimization**: Ensure the website is mobile-optimized to accommodate athletes who might be accessing the platform on-the-go.
5. **Social Proof & Trust Indicators**: Incorporate customer testimonials and trust badges (e.g., "Secure Payment" or "100% Satisfaction Guarantee") to establish credibility with potential customers.

Implementation Strategy:

1. **Technical Implementation:** Work with Oleksandr (Ops/Dev/Fin) to implement the technical aspects of the design, such as integrating a cookie policy management system and optimizing the website for mobile devices.
2. **Content Creation:** Collaborate with Menna (Marketing) to create engaging content that showcases high-protein meal options designed specifically for athletes, highlighting the benefits of choosing Homemade B.V.'s platform.
3. **Promotional Campaigns:** Partner with Walid & Khaylan (Sales Force) to develop targeted promotional campaigns that reach athletes in Amsterdam West, emphasizing the unique value proposition of Homemade B.V.

By addressing the UX weaknesses and implementing the key features and design recommendations outlined above, we can create an engaging user experience that attracts high-protein meal delivery customers in Amsterdam West and establishes Homemade B.V. as a leader in the market.

4. Economic Warfare

To develop a pricing warfare strategy for high-protein meal delivery in Amsterdam West, we'll analyze the competition and identify areas to disrupt their pricing.

Competitor Analysis

From the provided data, we have the following information about the competitors:

COMPETITOR	AVERAGE MEAL PRICE	DELIVERY FEE AVG	PLATFORM FEE	LOYALTY PROGRAM ACTIVE	PROMOTIONAL MECHANICS
UberEats - High-protein	12.5	3.99	0.9	Yes	10% discount on orders over €20 for loyalty program subscribers
Thuisbezorgd - High-protein	13.92	2.99	10.0	Yes	Promotion available for first-time users: -20% on their order.
Deliveroo - Performance Nutrition	12.56	2.5	0.3	Yes	10% discount for first order, free delivery on orders over €20
UberEats - Performance Nutrition	12.5	3.99	15.0	Yes	Discounts up to 30% off on orders over €20, and a free delivery for the first 5 orders
Thuisbezorgd - Performance	8.5	2.99	0.1	Yes	Surf & Turf

COMPETITOR	AVERAGE MEAL PRICE	DELIVERY FEE AVG	PLATFORM FEE	LOYALTY PROGRAM ACTIVE	PROMOTIONAL MECHANICS
Nutrition					
Deliveroo - High-protein	15.5	2.99	0.09	Yes	Free delivery on orders above €20

Identifying Gaps and Opportunities

Based on the analysis, we can identify the following gaps and opportunities:

- Thuisbezorgd - Performance Nutrition has a lower average meal price (8.5€) compared to other competitors.
- UberEats - High-protein and Deliveroo - Performance Nutrition have similar pricing structures, with an average meal price of 12.5€ and platform fees ranging from 0.3% to 15%.
- Thuisbezorgd - High-protein has a higher platform fee (10%) compared to other competitors.
- All competitors offer loyalty programs or promotions to attract customers.

Pricing Warfare Strategy

To disrupt the competition, we can develop the following pricing warfare strategy:

1. **Lowest Price Guarantee**: Offer high-quality, high-protein meals at a lower price point than Thuisbezorgd - Performance Nutrition (8.5€). This will attract price-sensitive customers and create a new standard for high-protein meal delivery in Amsterdam West.
2. **Competitive Pricing**: Match the average meal prices of UberEats - High-protein and Deliveroo - Performance Nutrition (12.5€), while offering more value through better customer service, higher-quality ingredients, or innovative menu options.
3. **Platform Fee Reduction**: Offer a lower platform fee than Thuisbezorgd - High-protein (10%), to attract chefs who want to save on commission fees and increase their earnings.
4. **Loyalty Program**: Develop a loyalty program that rewards customers for repeat orders, similar to those offered by the competitors.

Implementation Plan

To implement this pricing warfare strategy, we'll need to:

1. Conduct market research to validate our assumptions about customer preferences and pricing sensitivity.
2. Refine our menu offerings and pricing structure to meet customer demands and stay competitive.
3. Develop a loyalty program that rewards customers for repeat orders.
4. Communicate the new pricing structure and loyalty program to chefs, customers, and marketing channels.

By executing this pricing warfare strategy, we can disrupt the competition, attract price-sensitive customers, and establish Homemade B.V. as the go-to platform for high-quality, high-protein meal delivery in Amsterdam West.

5. Amsterdam Market White-Space

The given data appears to be a list of unmet needs and potential solutions gathered from Reddit posts in the Amsterdam community. The task is to identify the high-protein meal delivery for athletes in Amsterdam West as the priority strategic goal.

However, there are multiple relevant unmet needs that could potentially lead to growth hacking opportunities:

1. "Private Chef Services with Affordable Pricing" (id: c5716408-d9d6-4f09-af59-371849aebd4d): This need has a high validation score of 5 and a competitive gap of 8, indicating a potential opportunity for Homemade B.V.
2. "Dining Establishments that Cater to Medium-Sized Groups" (id: 72fc0e78-6e8d-41e6-be86-71fc07a74f3b): This need has a validation score of 4 and a competitive gap of 7, indicating another potential opportunity.
3. "Upscale, Trendy Restaurants with Good Wine Selections" (id: 53eafea9-005e-4e54-9157-28e859d4c86e): This need has a validation score of 4 and a competitive gap of 9, indicating another potential opportunity.

Considering the high-protein meal delivery for athletes in Amsterdam West as the priority strategic goal, here are some growth hacking ideas:

1. Collaborate with local chefs to offer custom high-protein meal plans for athletes.
2. Develop partnerships with sports teams and gyms to promote the service to their members.
3. Utilize social media platforms to target athletes in Amsterdam West and showcase the benefits of homemade, high-protein meals.

These growth hacking ideas can be explored further by analyzing competitor data (found in DB) to exploit their failures and steal their customers.

Here is an example report that provides 'Actual Gold' - high-impact, actionable hacks used for Customer Acquisition:

Growth Hacking Report

Goal: High-Protein Meal Delivery for Athletes in Amsterdam West

Opportunity Analysis:

- Partner with local chefs to offer custom high-protein meal plans
- Develop partnerships with sports teams and gyms
- Utilize social media platforms to target athletes in Amsterdam West

Competitor Analysis:

- Analyze competitor data (found in DB) to exploit their failures and steal their customers.

Actionable Hacks:

1. Collaborate with local chefs to offer custom high-protein meal plans for athletes.
2. Develop partnerships with sports teams and gyms to promote the service to their members.
3. Utilize social media platforms to target athletes in Amsterdam West and showcase the benefits of homemade, high-protein meals.

Conclusion:

By leveraging these growth hacking ideas, Homemade B.V. can capitalize on the unmet need for high-protein meal delivery among athletes in Amsterdam West and establish itself as a leading player in the market.

6. Holiday Demand Matrix

To create the Strategic Holiday Matrix for Homemade B.V., we'll analyze the provided data and identify opportunities to capitalize on high-demand holidays in Amsterdam. We'll focus on the top 5 most promising holidays with significant demand spikes.

Top 5 High-Demand Holidays:

1. **Koningsdag (King's Day)** - May 27, 2026
   - Demand spike prediction: High demand for food delivery is expected, especially during peak hours of 12pm-3pm.
   - Strategic opportunity:
     - Targeted promotions and discounts can be offered for delivery orders placed between 10am-11:30am.
     - Partner with local businesses to offer bundled deals and increase revenue.
2. **Eerste Paasdag (Easter Sunday)** - April 5, 2026
   - Demand spike prediction: High demand is expected, with a predicted increase of 25% compared to an average Sunday.
   - Strategic opportunity:
     - Offer a 'Easter Surprise' promotion or discount to customers.
     - Consider offering limited-time free delivery or a gift with purchase.
3. **Hemelvaartsdag (Ascension Day)** - May 14, 2026
   - Demand spike prediction: High demand expected.
   - Strategic opportunity:
     - Offer special Ascension Day meal deals and discounts.
4. **Bevrijdingsdag (Liberation Day)** - May 5, 2026
   - Demand spike prediction: High demand for food delivery services is expected due to celebrations and gatherings.
   - Strategic opportunity:
     - Offer special promotions or discounts during this time.
     - Expand delivery areas to cover more celebrations and events.
5. **Nieuwjaarsdag (New Year's Day)** - January 1, 2026

    - Demand spike prediction: High demand expected due to New Year's celebrations in urban areas like Amsterdam.
    - Strategic opportunity:
        - Offer promotions and discounts on popular items or collaborate with restaurants offering special NYD menus.

Additional Recommendations:

- Increase delivery personnel for peak hours between 11am-2pm on high-demand holidays.
- Run targeted promotions and increase revenue by partnering with local businesses to offer bundled deals.
- Consider offering limited-time free delivery or a gift with purchase during high-demand periods.

By capitalizing on these strategic opportunities, Homemade B.V. can maximize its market share and revenue during peak holiday seasons in Amsterdam.

- Achieve an average rating of 4.5/5 for high-protein meal delivery in Amsterdam West within 90 days

Budget Allocation:

- Marketing campaigns: 40%
- Referral program incentives: 20%
- "Chef of the Month" campaign rewards: 15%
- Ongoing optimization and analysis: 25%

8. Growth Hacking Gold

Here are 5 aggressive acquisition tactics to grow the high-protein meal delivery business in Amsterdam West:

1. Leverage Instagram Influencers

- Target influencers with a focus on fitness, health, and nutrition in Amsterdam West.
- Collaborate with them to promote Homemade B.V.'s high-protein meals as a sponsor or partner.
- Ask influencers to share their experience with Homemade's food through sponsored posts and stories.

Actionable Hack: Offer influencers an exclusive discount code (e.g., "ATHLETE15") for their followers in exchange for promoting Homemade B.V. on their social media channels.

2. Gamify the Referral Process

- Implement a referral program that rewards customers for referring friends to try high-protein meals.
- Introduce a leaderboard that ranks top referrers and offers prizes or recognition for the most successful referrals.

Actionable Hack: Offer a "Refer-a-Friend" discount of 20% off the next order, with a cap of €10, to encourage customers to share Homemade B.V. with their networks.

3. Target Local Fitness Studios

- Identify popular gyms and fitness studios in Amsterdam West that cater to athletes.
- Offer exclusive discounts or promotions to studio members, highlighting the benefits of high-protein meals for athletic performance.

Actionable Hack: Partner with 5–10 local studios to offer a joint promotion: "Train Hard, Eat Smart" – Buy one high-protein meal, get one free at participating studios.

4. Optimize Online Search Ads

- Analyze competitor data to identify gaps in online search advertising for high-protein meals in Amsterdam West.
- Create targeted Google Ads campaigns highlighting the unique selling points of Homemade B.V.'s high-protein meals (e.g., locally sourced ingredients, chef-prepared).

Actionable Hack: Target long-tail keywords like "high-protein meal delivery Amsterdam West" and "athletic meals near me" to capture intent-driven search queries.

5. Host a Fitness-Focused Pop-Up Event

- Organize a pop-up event at a popular location in Amsterdam West, such as a park or community center.
- Partner with local fitness enthusiasts and athletes to promote Homemade B.V.'s high-protein meals as the perfect fuel for athletic performance.

Actionable Hack: Offer attendees a limited-time discount on their first order (e.g., "POPUP20") and encourage social media sharing of the event using a branded hashtag (e.g., #HomemadeBVFuelYourFitness).

These tactics will help grow the high-protein meal delivery business in Amsterdam West by leveraging social influence, gamifying referrals, targeting local fitness enthusiasts, optimizing online search ads, and hosting engaging pop-up events.

9. SEO & Keyword Strategy

Based on the provided data and the priority strategic goal of targeting high-protein meal delivery for athletes in Amsterdam West, I'll create a comprehensive SEO & Keyword Blueprint.

Keyword Clusters:

1. **High-Protein Meal Delivery**
   - Keywords: "high protein plant based meals reddit", "recovery meals after workout", "lean meats meaning in urdu and examples"
   - Description: Target keywords related to high-protein meal delivery, focusing on plant-based options for athletes.
2. **Athlete-Focused Recovery Meals**
   - Keywords: "recovery meals after surgery", "how to recover after workout faster", "best recovery meals after workout"
   - Description: Identify keywords emphasizing the importance of recovery meals for athletes and individuals who engage in strenuous activities.
3. **Amsterdam West Location-Based Keywords**
   - Keywords: "recovery drink wielrennen" (cycling-related), "high protein plant based meals no soy" (location-specific)
   - Description: Incorporate location-based keywords to target the Amsterdam West audience and emphasize the unique aspects of your service.

Keyword Selection:

Based on the search volume estimates, competition index, and intent category, I recommend selecting the following top-performing keywords:

1. "recovery meals after workout" (700 search volume, medium competition)
2. "high protein plant based meals reddit" (500 search volume, medium competition)
3. "best recovery meals after workout" (1100 search volume, high competition)

Keyword Strategy:

1. **Primary Keyword**: "Recovery Meals After Workout"
   - Target long-tail keyword phrases related to this primary keyword.
   - Create content that addresses specific aspects of post-workout nutrition and meal planning for athletes.
2. **Secondary Keywords**: "High Protein Plant Based Meals Reddit" and "Best Recovery Meals After Workout"
   - Use these keywords as secondary targets, focusing on creating high-quality content that attracts users searching for related information.

Content Recommendations:

1. Develop informative blog posts highlighting the importance of recovery meals for athletes.
2. Create recipe pages featuring high-protein, plant-based meal options with clear instructions and images.
3. Write case studies or success stories showcasing athletes who have benefited from your service.
4. Utilize user-generated content (UGC) to create social media campaigns promoting your platform.

Tracking and Evaluation:

1. Monitor keyword rankings using tools like Ahrefs or SEMrush.
2. Track website traffic, engagement metrics (e.g., time on site, bounce rate), and conversion rates.
3. Regularly update and refine the content strategy based on user behavior and performance data.

By implementing this SEO & Keyword Blueprint, you'll be able to effectively target high-protein meal delivery for athletes in Amsterdam West, improving your online visibility, attracting relevant traffic, and driving conversions for Homemade B.V.
